

ENGINE DRIVEN WELDER

DUAL MAVERICK 450

50Hz POWER
240V / 415V

The Power of Two

Built for the construction site, the pipeline, and the hire fleet, the Dual Maverick[®] 450 is two complete welders in one. The design features the 26.4 HP @ 3000 RPM Perkins 403D-11 Tier 4i water cooled diesel engine. That is enough power for two operators to weld at the same time, or for one operator to gouge with up to a 9.5 mm carbon.

Save Money. Less Noise.

- Only one machine to service and maintain instead of two.
- New sound reduction techniques have lowered noise levels substantially from earlier models.
- Engine RPM varies based on the welding output required, resulting in less fuel being used, and less noise.
- Auto Stop-Start function will stop the engine after a user defined period of no welding activity. Start welding again simply by touching the electrode to the work.

Two Displays. More Control.

- Two 4.3", IP67 rated colour LCD screens provide increased functionality and easier setup than previous models.
- Intuitive push and turn digital controls make setup a breeze and guide the end user to the right weld settings.
- Maintenance reminders assist with maximising engine life and reliability.

Processes

Stick, TIG, MIG, Flux-Cored, Gouging

Applications

Construction, pipeline, maintenance and repair

Rated Output – Current/Voltage/Duty Cycle

Single Mode:
450A/26V/100% | 350A/34V/100%

Dual Mode:
225A/26V/100% | 210A/28.4V/100%
