

# **PROLINE**

professional welding supplies

## **INVERTER PLASMA CUTTER**

**High Frequency Start** **30 Amp**

- Latest IGBT Inverter technology for high efficiency and reliability with smooth cutting output up to 8mm.
- Robust metal casing for a long life.
- Compact & lightweight - only 10kg, ideal for on-site engineering and maintenance.
- Heavy duty cutting torch - long consumable life and high cut quality.
- HF start gives reliable and effective arc starting.
- Internal air filter and water trap for improved quality and protection of air supply to the torch.
- Includes quick set-up guide welding DVD.
- Lightweight, powerful and on a 10A Plug - Every home workshop needs one!

### **SPECIFICATIONS:**

Input Power Voltage:	230V 50Hz
Output Current Range:	10-130A
Duty Cycle:	60% @ 21A
Max. Cutting Thickness:	8mm
Arc Ignition System:	High Frequency
Weight:	10kg
Dimensions:	415 x 200 x 310mm
AC Plug:	10A

***Ideal for cutting panel & exhaust for the car enthusiast or in small workshops.***
