INVERTER MIG WELDER

Gas / Gasless **140 Amp**

- Multifunction power source: MIG, TIG, MMA capabilities - suitable for a wide range of welding tasks.
- Latest IGBT inverter technology for high efficiency and reliability with smooth welding output.
- Synergic setting adjustment allows simple adjustment for optimum settings.
- Suitable for gas & gasless MIG operation.
- Digital control - Clear and intuitive to operate.
- Euro MIG torch connection - universal torch system, easy replacement of welding torch.
- Heavy duty aluminium chassis wire feeder for consistent, smooth and reliable wire feeding.
- Includes quick set-up guide welding DVD.
- Optional MMA leads and TIG torch available.
- 10A Plug - Ideal for auto workshops.

SPECIFICATIONS:

Input Power Voltage:	230V 50Hz
No Load Output Voltage:	50 - 80V
Output Current Range:	20-140A
Duty Cycle:	15% @ 140A
Wire Diameter:	0.6, 0.8 & 0.9mm
Max. Welding Thickness:	8mm
Wire Spool Capacity:	200mm Diameter Spool
Weight:	14kg
Dimensions:	415 x 220 x 315mm
AC Plug:	10A

***Ideal for light industrial
MIG Welding for panel
beating garages and
engineering workshops.***
