

WB500 WELD CLEANER

The Fast & Affordable Weld Cleaner

Cleans Heat Tinting On
Stainless Steel Welds

Introducing the WB500, the latest in
fast and affordable weld cleaning technology
from the leaders in the field.

Cleans & polishes heat tinted metal welds safely & easily

The WB500 is fast, inexpensive and easy to operate. Safely clean stainless steel from heat tinting caused by Tig, Mig, and Arc welding without the use of toxic chemical cleaners. It's compact, lightweight and acid resistant construction makes this unit highly durable and very portable.

Patented brush shroud protects & concentrates cleaning power

The patented sliding shroud protects the shell of the brush and concentrates the cleaning power into a smaller and more defined area. The shroud also allows better control over the splay of the brush head for more effective results in confined spaces and reducing accidental shorting.

Machine Package
includes replacement
brush tips & cleaning
fluid.
