

## Pedal Type Spot Welder

- ▶ Pedal-level type spring-pressing structure makes the machine easy to operate and convenient to maintain;
- ▶ Thyristor non-contact switch circuit ensure the machine shut off quickly and more reliable;
- ▶ Welding time is adjusted and good welding repeatability;
- ▶ Widely used for welding of low carbon steel; wire stainless steel plate etc;
- ▶ Low consumption of main transformer power and low no-load current.

| Model                     | DN-10    | DN-16     | DN-25     | DN-35   |
|---------------------------|----------|-----------|-----------|---------|
| Power Voltage(V)          | 240      | 380       | 380       | 380     |
| Frequency(Hz)             | 50       | 50        | 50        | 50      |
| Rated Input Capacity(KVA) | 10       | 16        | 25        | 35      |
| Rated Primary Current(A)  | 26.3     | 42.1      | 63        | 92      |
| Rated Duty Cycle(%)       | 20       | 20        | 20        | 20      |
| No-load Voltage(V)        | 1.65-2.4 | 1.98-3.01 | 2.25-3.58 | 3.1-5.2 |
| Welding Thickness(mm)     | 1.5+1.5  | 2.0+2.0   | 2.5+2.5   | 3.0+3.0 |
| Adjust Step               | 4        | 4         | 4         | 4       |
| Weight(KG)                | 72       | 82        | 100       | 105     |
