- Rotabroach™ Raptors are high performance annular cutters, with specially designed tooth geometry, only found on Raptor cutters.
- Made from M2AL, for greater cutter hardness, Raptor cutters deliver optimum performance, with increased speed of cut and maximum tool life.
- Can cut materials up to a maximum tensile strength of 900 N/mm<sup>2</sup>

Stage hardened allowing for greater flexibility during operation.

Designed to give longer tool life and faster cutting times.

When using annular cutters we always recommend you use a pilot pin.
