

DW7000XL

PROFESSIONAL WELDING HELMET
WITH RESPIRATOR

**Optimised for all welding processes
including MIG, TIG and ARC**

Complies with
AS/NZS 1337.1
AS/NZS 1338.1

**With
filtration
unit!**

Auto Darkening Helmet complete with clean air supply
to protect you in dangerous welding environments

- Samsung heavy duty lithium ion batteries
- Battery powered PRSL filtration unit included
- New generation auto darkening lens with reinforced battery slot and locked control panel
- New S13 ADF with extra-large viewing area and "true colour" colour restitution and contrast enhancement - allows operator to see the full colour spectrum clearly and saves eye strain
- Included shoulder harness clips on to the padded belt for increased comfort and weight distribution
- Variable shade 5-13, suitable for all welding processes including plasma cutting and grinding
- Polycarbonate safe shade DIN 5 side vision for 160° vision
- Full size clear grinding visor under flip-up front for perfect vision during grinding
- Four arc sensor for ultra-fast switching time
- Variable shade and sensitivity adjustment with digital display
- Ergonomically shaped and perfectly balanced - provides full protection for forehead, skull, ears and neck
- Full 4-way adjustable headgear provides great comfort and allows for welders with corrective glasses
- Super lightweight - only 621g.
